ADVANCE ANTI-SLIP SURFACES

Advance technology brings you Antislip products designed to prevent accidents in internal or external areas where long-lasting, hardwearing antislip surfaces are required.

Our Advance Antislip Products incorporate a high solids heavy duty Antislip surface designed for application in slippery areas to provide firm footing, **even after heavy spillage and soilage**.

Applications

Advance Anti-slip products come in a wide variety of sizes and can be installed on many surfaces including:

- Steel Mesh/Grille
- Stair Landings
- Steps/Stairs
- Ladder Rungs
- Checkerplate Workstations
- Wooden and Masonry Ramps
- Concrete Areas

Properties

Advance Anti-slip Products are designed to provide optimum toughness, strength and corrosion resistance against:

- Acids & Alkalis
- Solvents & Detergents
- Oil, Grease & Hydraulic Fluids
- Alcohol
- Saltwater
- Fire Retardant in the Cured State

Range

Advance Anti-Slip Surface products have an extensive range of grades and colours, in particular the safety yellow, which provides high visibility and clear definition of the leading edge of stairs.

Grades

- Fine
- Heavy duty
- Industrial
- Offshore

Standard Colours

- Safety yellow
- Brown

Optional Colours

- Black
- Grey
- Red
- British racing green
- Terracotta
- Ocean Blue

ADVANCE ANTI-SLIP SURFACES

Some of the many applications for Advance Anti-Slip Surfaces

- Oil refineries / rigs
- Industrial equipment / machinery
- Petrochemical / smelting
- Manufacturing plants
- Tanneries / abottoirs
- Factories / warehousing
- Shipping / dockyards
- Mining sites
- Engineering plants
- Hospitals

ANTI-SLIP SURFACES P/L

The ideal solution for preventing costly accidents in slippery areas

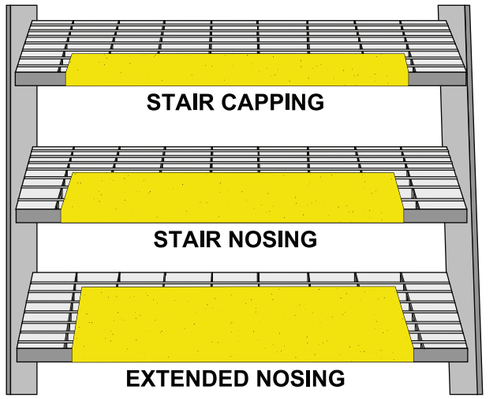
ADVANCE ANTI-SLIP SURFACES

Stair Products – Stair Cappings and Nosings

Advance Anti-slip Stair Cappings and Nosings with the Bull Nose turn down are a metal backed product with a high solids, heavy-duty anti-slip surface designed for application in slippery or hazardous areas to provide a firm footing, **even after heavy spillage and soilage**.

This product provides more surface area contact on the leading edge for a firmer footing and causes less wear to the stair capping and nosing.

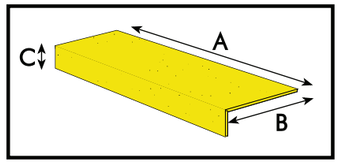
Stair Cappings and Nosings can be produced to suit any type of stair area that can be slippery, hazardous and dangerous including steel mesh/grille, checkerplate, concrete and timber.



Product Features

- Provides secure footing on wet & oily surfaces.
- Highlights leading edge of step.
- High impact resistance.
- Excellent chemical & UV resistance.
- Pre-Drilled for simple installation.
- Long effective life.
- Easy to clean.

Standard Sizes (Nominal)		
Width (A)	Depth (B)	Return (C)
350 mm	75 mm	20 mm
450 mm	150 mm	25 mm
600 mm	215 mm	
750 mm		
900 mm		
1200 mm		



Installation Methods

Over Grille: Use universal bolt & clamp assembly.

Over Steel / Aluminium / Masonry / Timber: Use self-tapping screws, countersunk screws or rivets with a silicon sealer under the edges.

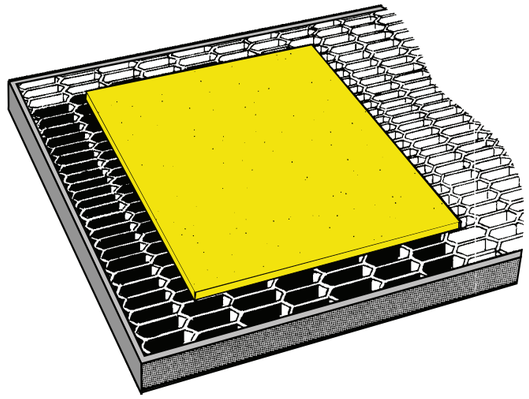
Over Concrete: Drive nails with a silicon sealer under the edges.

ADVANCE ANTI-SLIP SURFACES

Surface Products – Safeplates

Advance Antislip Safeplates are a flat metal backed product with a high solids heavy duty Antislip surface designed for application in slippery or hazardous areas to provide firm footing, even after heavy spillage and soilage.

Advance Antislip Safeplates can be produced to suit any type of area that can be slippery, hazardous and dangerous including steel mesh/grille, checkerplate, concrete and timber.



Product Features

- Provides secure footing on wet & oily surfaces.
- High impact resistance.
- Excellent chemical & UV resistance.
- Pre-Drilled for simple installation.
- Long effective life.
- Easy to clean.

Standard Sizes (Nominal)	
Width (A)	Depth (B)
200 mm	100 mm
400 mm	200 mm
600 mm	400 mm
750 mm	600 mm
900 mm	
1200 mm	

Installation Methods

Over Grille: Use universal bolt & clamp assembly.

Over Steel / Aluminium / Masonry / Timber: Use self-tapping screws, countersunk screws or rivets with a silicon sealer under the edges.

Over Concrete: Drive nails with a silicon sealer under the edges.

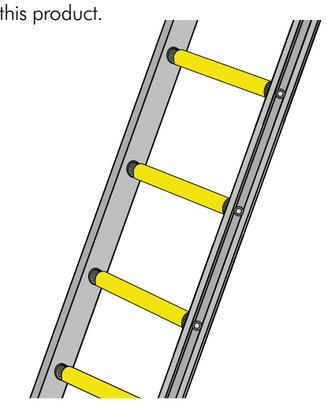
ADVANCE ANTI-SLIP SURFACES

Ladder Products – Ladder Rung Covers

Advance Antislip Ladder Covers Ladders with the Semi Circular or Rectangular bend are a metal backed product with a high solids heavy duty Antislip surface designed for application in slippery or hazardous areas to provide firm footing, **even after heavy spillage and soilage**.

Advance Antislip Ladder Covers are designed to snap fit to any type of ladder rung including square, rectangular or rounded.

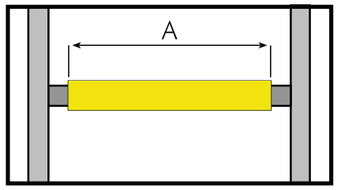
By ensuring the Ladder Cover is the same shape as the ladder rung a complete contact is made with the entire Ladder Cover to the ladder rung that provides **maximum adhesion** between the two further increasing the safety of this product.



Product Features

- Provides secure footing on wet & oily surfaces.
- High impact resistance.
- Excellent chemical & UV resistance.
- Pre-Drilled for simple installation.
- Long effective life.
- Easy to clean.

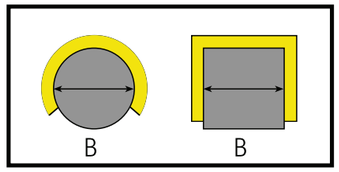
Standard Sizes (Nominal)	
Width (A)	Diameter of Rung (B)
250 mm	20 mm
300 mm	25 mm
350 mm	30 mm
400 mm	35 mm
450 mm	
500 mm	



Installation Methods

Ensure the ladder rungs are free from all dirt, oil grease and paint.

Apply 5mm of Advance's recommended adhesive to the inside of the ladder rung.

Snap fit to ladder rung.


Allow 6 to 8 hours to cure..
